

Information for Students

Services for barrier examination and obtaining a medical certificate for physical education are provided at **St. Petersburg State Budgetary Healthcare Institution "City Outpatients Clinic No. 76"** at the address: Khlopina st., 11, Building 1, (without calling the service center first).

The barrier examination includes the following services:

- Appointment with (examination, consultation of) a general practitioner/pediatrician/infectious disease specialist
- Appointment with (examination, consultation by) a gynecologist/urologist (without taking a Papanicolaou smear)
- Peripheral vein blood sampling
- Haemalysis for Form 50 (HIV infection)
- Micro-flocculation blood test and Wassermann test (syphilis)
- Chest X-ray
- Urinalysis
- Helminth ova and pathogenic protozoa exam
- Microscopic thick smear on vernal fever plasmodium (upon request)
- Post-void residuals test for blood fluke (*Schistosoma haematobium*) (upon request)

Obtaining a medical certificate for admission to physical education classes includes the following services:

- Exercise stress test
- Blood sampling for glucose test
- Blood serum glucose test
- Appointment with a general practitioner (pediatrician) for obtaining a medical conclusion on admission to physical education

The vaccinal prevention includes the following services:

- Vein blood sampling for immune protein tension titer test
- General practitioner's (pediatrician's) examination for admission to vaccination
- Intramuscular (subcutaneous) vaccine administration (by a nurse, paramedic practitioner)

To organize the provision of services payable in accordance with the Insurance Program, the Insured person must contact the emergency service phone:
